

# **Sharing Sight through Transplantation**

**Eye Bank Association of  
America  
and  
Participating Eye Banks**

# Sharing Sight Project

- **10 Million individuals globally who are blind due to corneal disease and injury**
- **Over 300,000 children with treatable corneal blindness in project countries**
- **More than 200,000 adult caregivers of children in project who have corneal blindness which is correctable**

# Sharing Sight Project

- **Limitation to treatment is donor tissue availability**
- **Facilities and staff exist to provide the transplants if tissue becomes available**

# Share Sight Project

- Bangladesh, Guatemala, South Africa
- 9 months
  - **20 transplants in Bangladesh**
  - **40 transplants in Guatemala**
  - **40 transplants in South Africa**
- 18 months (second 9 months)
  - **40 transplants in Bangladesh**
  - **60 transplants in Guatemala**
  - **60 transplants in South Africa**

# Expectations

- **86% to 90% success rate**
- **Project can be ramped up and implemented worldwide based on pilot outcomes**
- **Outcomes will be measured at 3 and six months post transplant**

# Expectations

- **Hundreds of thousands could ultimately benefit**
- **Awareness will increase for donation and eye bank programs can be developed or increased in underserved areas of the world.**

- 
- **Sight is vital in under developed countries for:**
    - **Development**
    - **Learning**
    - **Socialization**
    - **Survival (especially in children)**

- **Begin the Sharing.....**

**Share Sight  
through  
Transplantation**

- **Sharing Sight through Transplantation**
  - **New initiative**
  - **Global application**
  - **Build on local services**
  - **Positive change for children's lives**
  - **Personal impact and community outreach**
  - **Budget sensitive with economic benefit**
